Tired of Shaving or Waxing unwanted Hair?

We have the perfect solution for you...

Gentle NDYag Medical Grade Laser Hair Removal System.

Laser hair removal is a safe and painless method of removing unwanted hair.

Laser hair removal is different to IPL which uses less powerful, diffused light waves.

Laser hair removal can be used on any part of the body including most common problem areas such as face, legs, underarm and bikini areas.

Many professionals and celebrities choose laser hair removal as it is considered the highest quality, most safe and effective way to remove unwanted hair.

We use Candela's Gentle Yag Pro Laser Hair Removal System with:

- Excellent Results
- Ultra fast treatments (less than 5mins for Underarm treatment!!)
- FDA Approved-Industries Leading Medical Grade Hair Removal System, used by Thousands of Doctors Worldwide.
- Suitable for all types of skin, especially suited (safest type of Laser) for darker / Asian skin types
- Our system provides the safest wavelength (NDYag 1064nm) for protecting all skin types at the surface while effectively destroying the hair follicles for long lasting results
- Hair is targeted with Laser Energy, destroying it at its roots while preserving the surrounding skin leaving it smoother, free from unwanted hair
